Re: CHORE-TIME STAINLESS STEEL LOWER BOOTS

June 1, 2019

Chore-Time's metal boots are designed and built for quality. They feature baffles and restrictions and a rounded bottom to better fit the lower boot to the auger and enhance feed flow. The Chore-Time's lower boots are designed with no corner, so feed does not accumulate. The clean-out plate on the side of the boot provides ready access to the auger and can be removed easily by loosening two wing nuts.

- Chore-Time top quality
- Competitively priced
- Makes any needed maintenance easy to accomplish
- The lower boots are available in both 304 Series stainless steel and traditional galvanized steel for most Flex-Auger® Systems.

Stainless Available:

Chore-Time Model 55 Flex-Auger®
Chore-Time Model 75 Flex-Auger®
Chore-Time Model 75 Plus Flex-Auger®
Chore-Time Model 75 Plus Extension Hopper
Chore-Time Model 90 Flex-Auger®
Chore-Time Model HMC Flex-Auger®
Chore-Time Flex-Auger® Flag System

Part Numbering:

- Add SS as suffix (no dash, no spacing)
