

CHORE-TIME[®]

AD-LIB LACTATION FEEDERS FOR SOWS

DESIGNED FOR MAXIMIZED PERFORMANCE

- › Helps wean, heavier, healthier pigs
- › Save labor and time
- › On-demand feeding

AD-LIB LACTATION FEEDERS FOR SOWS

Chore-Time's Ad-Lib Lactation Feeders enable a sow to self-feed as much feed as her daily ration program permits. This sow feeder provides pig producers with a better way to manage their nursing sows. The feeder maximizes both piglet growth and sow feed intake while also helping the sow to maintain body condition for the next litter. The feeder can be filled manually or automatically using one of Chore-Time's feed conveying systems.

Adjustable Ad-Lib Feeder for all feed types

- > The metered feeding concept requires sows to work the feeder to get the feed they want.
- > Easily achieve ½ oz. per push setting with mash, crumbles, pellets, cracked corn or shelled corn feeds.
- > Maximizes feeding efficiency by controlling the rate feed is dispensed.
- > System designed to reduce waste by overactive or playful sows.
- > Designed for farrowing and gestation applications.

Ad-Lib Feeder for mash feed

- > Use with mash feed only.
- > Low-cost solution for maximizing feed intake and milk production.
- > System is designed to reduce waste by overactive or playful sows.

Simple, robust design

- > All top quality welded 304 Series stainless steel construction.
- > Only three components and only one moving part, reducing service issues.
- > Easy to disassemble and clean.
- > Simple installation because feeder body diameter is less than 3 inches (76 mm).
- > The design allows water to be in the bowl with the Ad-Lib Feeder without moisture plugging the feeder.
- > This feeder offers the unique ability to provide a combination of an ad-lib feeder and an added water supply.

Large stainless steel manual feeding hopper holds 15 lbs. (6.8 kg) to save labor and limit number of trips with a feed cart.
