

CHORE-TIME[®]

ACCESS PLUS[®] **HOPPER ACCESS DOOR**

EASY ACCESS FOR FEED BIN CLEAN-OUT

- › Easily access the inside of the feed bin
- › Convenient ground-level bin cleaning
- › ALL-OUT[®] Feed Management System

FEED BINS

ACCESS PLUS® HOPPER DOOR

Chore-Time's ACCESS PLUS® Hopper Door makes it easy to clean out your feed bin from ground level. This access door offers an easier option for bin cleaning versus the need to climb and then enter the confined space of the feed bin. Instead, you simply open the ACCESS PLUS Door panel, clean out the bin's interior and then close the door. ACCESS PLUS - it's another feature of Chore-Time's state-of-the-art feed storage bins and their innovative ALL-OUT® Feed Management System.

Permits easy feed bin cleanout from the ground

- > Growers no longer have to climb the feed bin to clean it. Instead, they simply open the ACCESS PLUS® Door panel, clean out the feed bin's interior while standing on the ground and then close the ACCESS PLUS Door panel when they are finished.
- > Door is located in the feed bin's hopper for convenient, ground-level access to the interior of the feed bin.
- > Simply removing the "T"-handle bolts (no tools needed), frees the ACCESS PLUS Door panel to be lifted out of the bin's hopper to start the interior cleaning process.
- > The Chore-Time ACCESS PLUS Door's opening is ergonomically-shaped to make it wider at the top than it is at the bottom. This allows users to easily and comfortably clean out the feed bin.
- > After the cleaning chores are completed, the user simply returns the door panel to the opening and tightens the "T"-handle bolts.
- > The ACCESS PLUS® Door Panel also features a rubber-like seal to re-seal the hopper opening when the door is back in place.
